DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "a groove" as recited in claim 7 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Application/Control Number: 10/702,505

Art Unit: 3616

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "the inside thereof" in 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Prior art figures 1-4 of the instant application.

Prior art figures 1-4 disclose a cushion for an air bag system, the air bag system including a cushion expanded to the front of a passenger by means of gas discharged from an inflator when a collision of the vehicle occurs for absorbing shock transmitted to the passenger, wherein the cushion comprises: a main panel (22) having an inlet part (20) formed at one side thereof for allowing the gas discharged from the inflator to be introduced into the cushion therethrough; side panels (24) attached to both open sides of the main panel by means of sewing, respectively; and a tether (26) having one end fixed to the inlet part (20) of the main panel (22) by means of sewing and the other end fixed to the inner side of the panel opposite to the inlet part of the main panel while not

Application/Control Number: 10/702,505

Art Unit: 3616

intersecting with the parts where the main panel and the side panels (24) are sewn; wherein one end of the tether (26) is fixed to the main panel (22) so that the tether (26) forms the inlet part together with the main panel (page 5, lines 15-17 of the instant specification); wherein the tether (26) is sewn to a first sewing part (28) sewing the main panel (22) and the side panels (24) at both sides of one end thereof, and wherein a second sewing part (30) sewing the end of the tether to the main panel is formed such that the first and second sewing parts intersect each other (A); wherein the tether (26) has notches formed at both sides of one end thereof where the second sewing part (30) is formed; wherein the notches are formed at both sides of one end of the tether with steps such that the width of the tether is reduced; wherein the end of the tether is disposed between the parts where the first and second sewing parts intersect each other; wherein the notches are formed with L-shaped steps; wherein the stepped parts are rounded; wherein the tether has wing parts formed at both sides of one end of the tether such that the wing parts cover the first sewing part 58 at the inlet part (see prior art figures 3-4 below for examiner's interpretation).

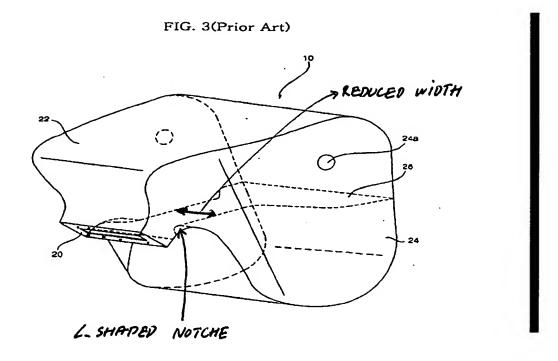

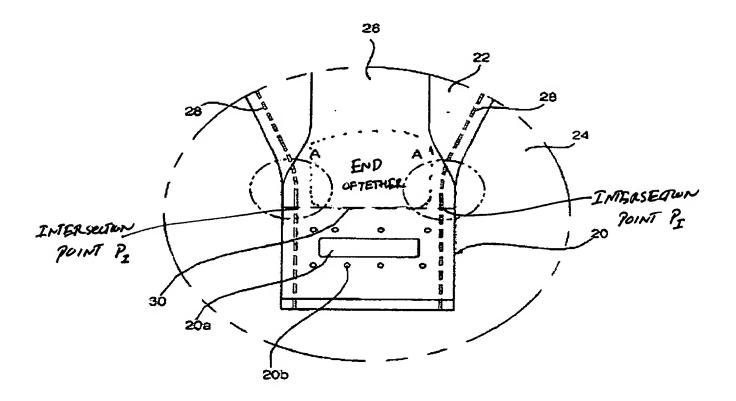

FIG. 4(Prior Art)

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan C. To whose telephone number is (571) 272-6677. The examiner can normally be reached on Mon-Fri (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on (571) 272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
